Facial Massage (Kobido)

Kobido is a thorough and refined technique of facial massage of Japanese origin, formerly reserved exclusively for the imperial family. By exercising pressure on the meridians as well as the acupuncture points of the face, the massage has a natural energy boost effect and can repel stress in a surprising way. Kobido alternates a succession of fast movements, soft digital pressure, plucked percussions and lifting of the face. The massage generates a good flow of energy. A true moment of happiness!
